

“When it was time to move away from separate software solutions, SAP was a natural choice for Gasrec. It ensured a robust, scalable solution that’s flexible and able to handle multiple business processes; including order processing, project management, purchasing, production, sales and fuel logistics - all with integrated accounting and financial management. There were many, compelling reasons why we should invest in SAP - its specialisation in this industry, a scalable reporting and Business Intelligence suite and a comprehensive portfolio of mobility tools among them. ISB Global had proven expertise in the green, environmental and fuel sectors so were the obvious choice for an implementation partner.”

Rick Twomey
Project & Systems Manager
Gasrec

Gasrec Success Story

Project Highlights

Key Challenges

- Integrate end to end processes including project management, sales, purchasing, production, fuel logistics and accounting in a single software solution
- Manage comprehensive fuel production data, inventory, orders and fuel logistics, ready to extend functions at key stages as the business grows
- Manage reporting packs; including tanker certificates tracking quantities confirmed, ordered, loaded, delivered and any fuel left on board (LoB). All consolidated for posting into finance
- Highlight key fuel logistics KPI's throughout the project and install departmental dashboards to monitor those KPI's

Objectives

- Move multiple software applications into one integrated software solution, incorporating all business processes and reporting requirements
- Incorporate production, planned logistics and tanker certificate spread sheets into process and output reports for multiple deliveries
- Manage and audit material movements into continuous process production; from the production process to inventory, delivery and invoicing
- Comprehensive project, cost and fixed asset accounting is transparent and information easily accessed in KPI reports

Implementation Best Practices

- Core logistics, production and financial processes delivered in SAP Business One, ready to scale at mid-term growth stages
- Comprehensive blueprint workshops ensured project, sales, operations and finance teams were fully conversant with the proposed solution
- User-defined tables & fields used to extend functionality and incorporate key additional manufacturing and logistics processes
- Secondary project stages, planned to implement enhancements for supply chain optimisation, are aligned to growth and business case

Why SAP Business One & ISB Global?

- A cost effective, integrated and scalable solution, including asset management and mobility, all based on industry standards and best practice
 - A full set of scalable business intelligence tools allows for greater insight into diverse processes as business grows
 - Pre-configured processes and the ability to easily add functions in a rapidly growing business
 - Experience in mid and downstream fuel logistics, green and environmental sectors ensured a good understanding of industry requirements and best practices
-

Strategic & Financial Benefits

- Incorporation of multiple processes in SAP Business One streamlines total operations; offering scalable best practice in a tried and tested industry solution
- Moving to SAP Business One unifies and aids continuity of data; providing key information on building a new business in a rapidly growing industry sector
- Increased control over fuel production and logistics can now be managed due to better insight into process, with the introduction and monitoring of KPI's
- Key processes are now managed in SAP Business One, which saves time and provides essential scalability – allowing Gasrec to add functional enhancements to production, logistics and BI and, as part of a continuous improvement program, deliver these extensions to mobile devices

SAP Business One and WR1

SAP Business One is fully integrated business management software. It is built on world class technology software - SAP, the largest business management software company in the world. It is a full ERP system that integrates all functional areas for a small to midsize companies. Accounts, Financials, Customer Service and Relationship Management, Sales and Purchase Order Processing, Stock, Warehousing, Supply Chain and Manufacturing for reprocessing and recycling companies.

WR1 is the waste and recycling Add On developed by ISB Global within SAP Business One's Software Development Kit (SDK). This has been certified by SAP and ISB Global has been awarded the prominent position of Global Software Services & Technology Partner (SSTP). It aids in the complex management of Customers and Suppliers, Job and Order Scheduling, Multi-Waste Classifications, Vehicle and Route Management, Weighbridge Integration, Mobility, Service Delivery and Depot Management, Reporting and Compliance Management, Confirmation, Invoicing, Reporting and Business Intelligence.

Partner

ISB Global was established in 1998 and became an SAP Business One Value Added Reseller (VAR) in 2005. ISB Global is also an SAP Software Solutions & Technology Partner (SSTP) with the certified and supported integrated industry add-on, Waste & Recycling One (WR1).

ISB Global has significant experience in SAP implementations with major multinational companies in mid and downstream Oil & Gas and has been installing SAP and Waste & Recycling One in companies that specialise in Waste Logistics, Materials Recycling and associated industries; including: Broking & Trading, Plastics, Electronics, Hazardous Materials, Industrial Services & Maintenance, Organics, Environmental, New Energy, Utilities and Bio Fuels.

As a certified software partner, SAP fully supports ISB Global and the Waste & Recycling One solution. SAP customers are able to benefit from a comprehensive support programme; including a customer web portal, free patch updates, free upgrades, knowledge forums, expert communities, online training and learning sessions, complimentary content, applications and white papers; as well as access to the largest business software company community in the world.
