

Waste & Recycling One for SAP Business One In the Cloud

Introduction

How can you realise the benefits of Waste & Recycling One as the only true integrated business management software solution, without the time costs or resources to implement and maintain an on-premise solution?

Look to the Cloud! Waste & Recycling One is now available as a hosted service, so you can get all the benefits without the cost and on-going IT resource required to maintain the software, it's done for you in an effective, easy monthly subscription investment.

Challenges

Multiple Applications & Duplication of Effort

Accounting, Spread Sheets, CRM & Operational applications lead to manual data input, duplication of effort, inaccuracies, manual reporting and difficulty in making informed decisions?

High Investment & On-going Cost

Multiple applications are expensive to maintain, require onsite knowledge, interfaces need maintenance and fixing through continual upgrade process, software is not beneficial but a burden to work on and administer?

Expensive Software, Technology & Resources

Continually out of date and requiring upgrades, hard to keep up with, expensive to maintain, confusing, too technical, no flexibility, no advances and difficult to find people who will give you a straight answer?

Inflexible & Constrained by Current Applications

Want to add functionality, change a report, add mobility, use a CRM, increase speed, know more about your business but you can't, it costs too much, unsure what to choose, can't add to current software?

Lack of Support

What are you paying for? Adding more functions leads to more expensive help, costly upgrades, then more work in compatibility between applications, total reliance on software companies with little in return?

Features

Totally Integrated Functions – Still the same Waste & Recycling One with tightly integrated functions, which manage the entire end-to-end business process in half the time it takes to manage the same on separate software solutions. Deployed effortlessly with a condensed set up, for quicker time to value.

Transparent Costs – The investment is divided into an easy to understand monthly subscription fee according to license amount and types required, support and maintenance is added to the monthly fee. Condensed Set Up (CSU) is a standard fixed cost according to the set-up type.

On-going Innovation – Waste & Recycling One, support, maintenance, additions and roadmap, along with SAP's 5 market categories in Applications, Analytics, Mobility, Database & Technology are added to your solution either free of charge as part of planned technology advances or scalable as part of the core proposition of the Waste & Recycling One software.

World Class Security – All data is protected in contractual terms in secure data centres with physical and network safeguards. This includes secondary data centres for disaster recovery, service level agreements guaranteeing 99% uptime, availability and performance.

Quality Support & Maintenance – The set-up of Waste & Recycling One is designed to be quick, efficient and train your team with the knowledge to be as self-sufficient as possible. Support & Maintenance is governed by a contract, which includes support from ISB Global, support from SAP, free upgrades, access to further training and the largest online business community in the world.

The Outlook

Integration, Automation & Business Process

Waste & Recycling One is one software solution, linking tasks, activities and the entire end to end process by use of Master Data, automating process where possible it cuts administration time by 30% per user, per day

Return on Investment & Business Benefits

WR1 has a compelling business case, ISB Global is focused on the return on investment (RoI) and delivers the business benefits stated as part of the Condensed Set Up (CSU) - no other competitor does this

Training, Self Sufficiency & Ease of Use

Including team training, ensuring self-sufficiency, 1st line support so you don't rely on us, WR1 is easy to use, add fields, design reports and conduct your own analysis, how you like, when you like

Flexible & Scalable

WR1 is designed to grow with your company, want to add something, configure or development then we can accommodate all, quickly, cost effectively, you choose the additional functions and we'll add them

Cost, Affordability & On-Going Innovation

WR1 in the cloud is costs effective, you don't need the hardware or the resources, it's inexpensive and designed to keep up with technology

Summary

Waste & Recycling One for SAP Business One provides small businesses working in the Waste, Recycling and Renewables sector the ability to realise the benefits of a totally integrated business management software solution in the Cloud for a monthly subscription fee. ISB Global has also tailored the implementation set-up to a "boot-camp" delivering the critical business change across a short, condensed time frame, while still receiving the detailed and thorough scope, testing and training you would expect from an SAP Software & Solutions Technology Partner.

Subscription starts from as little as £9 per day, per user.

(Based on a 10 user model, 36 month subscription. Excluding technical & configuration set up. T&C's apply)
